MDR Reduces Threat Detection and Response Challenges

ESG InstaGraphic

76%

of IT and cybersecurity professionals say threat detection and response is more difficult today than it was 2 years ago.

Organizations struggle with threat detection and response (TDR) because of the high volume of alerts and the increasing sophistication of attacks. Savvy CISOs turn to managed detection and response (MDR) services to utilize providers' technical acumen, machine-based detection, and threat curation, and to respond faster. The best solutions will feature services that have high fidelity threat intelligence and take preapproved proactive response actions on behalf of the customer.
